

# SKM-4 Operating Instructions

SB 090

## TO DEPLOY

1. Firmly tap pedal with toe which releases catch and deploys step. Step will lock out in deployed position.

## TO STOW

2. Support yourself by holding a nearby handle or rail.
3. Place ball of foot on pedal with part of foot on yellow strip. Press pedal down, ease step in, whilst releasing pressure on ball of foot as step stows. Step may stop a few inches from stow if not done correctly. Repeat if this happens.
